DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on January 26, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,762,847 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Remarks

2. Applicant's arguments have been accepted because they have overcome all objections and rejections of the previous office action. Claims 1-12 are pending in the case.

Allowable Subject Matter

3. Claims 1-12 are allowable.

4. Claim 1 is allowable because the prior art of record, taken alone or in combination, fails to disclose or render obvious a sensor system for computing placement information about a component in an electronic component handling machine, the machine releasably holding the component and adapted to rotate the component, the sensor system comprising a sensor, and, a plurality of light sources in the sensor disposed to illuminate a sensing field in the sensor, in combination with the rest of the limitations of the respective claims.

5. Claims 2-12 are allowable because they are dependent on independent claim 1 or an intermediate claim.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
